Compressor Sound Covers

J&M Fluidics, Inc.
851 Tech Drive
Telford, PA 18969

Need to Control Compressor Noise?

We offer compressor covers that have been tested to achieve results up to **12.5dBA** soundpower reduction in suppressing unwanted compressor noise.

Features Include:

- Absorbs airborne sound and noise energy
- Dampens vibration and shock
- Provides a barrier to air-borne energy
- Isolates structural borne energy
- Easy to cut, fabricate and install
- Weather resistant

Covers also come with in a variety of different surfaces to provide you with the best cover for your application.

High-Temp covers are available if severe conditions or excessive heat is an issue. The material in these covers consists of a quilted fiberglass fabric over a 1" thick fiberglass filler. This material is usable up to 550 degrees F.
