

J&M Fluidics offers...

Water Flow Switch

J&M Fluidics, Inc.
851 Tech Drive
Telford, PA 18969

Flow Chiller Protection (Standard on all J&M Chillers)

**Installed -
Water Flow Switch**

The **water flow switch** is a transmitter that senses the water flow of the chiller... If there is low flow or even no flow, the water flow switch will shut down the chiller for protection. This protection is standard on all our chillers.
